Bears Get a Slight Advantage Due to Loudon Trading.

Deacon White Confident That Prices Will Go Higher.

Fattie Intent to Break Whiskey Trust Stock.

HE selling of stocks for London accounts for the difference of the local bull leaders, with one exception, gave the bears the advantage in today's stock market. The market made an impression on certain stock, notably Chicago Gas, which broke 2 points to 53 1/4 on Chicago advices that the city authorities are about to institute a franchise for the company which went in to the consolidation.

The bears managed to neutralize the good effects of the proposed silver inflation, at least for the time being, but they lost considerable stock by the operation.

S. V. White appears to be the only prominent operator in the bull ranks who has a spark of courage. The Deacon is quoted as saying: "I am one of those who look upon the happy side of life, and I am of the opinion that prices will be higher, and those who act on the bull side for some time to come will reap the benefit."

The early decline in prices ranged from 1/4 to 1/2 per cent. outside of Chicago Gas. At the lower figures, the bears looked heavily, one house alone taking 5,000 shares of St. Paul.

The attempt to break Distilleries and Cattle Feeding stock for effect on the general list was not an overwhelming success.

The price was forced down 1 per cent. to 45, but when the shorts tried to get back their stock there was a sudden jump to 47 1/2. Money on call was in good supply at 3 1/2 and 4 per cent., with the final transactions at 3 1/2 per cent.

Total sales of listed stock, 159,000 shares.

SPECIAL TO THE EVENING WORLD. Broome Park, New York, July 9.—Another hot day greeted the New Yorks in their last game with the Buffalos, and the outcropping "saw-and-saw" men on the grand stand did a stirring trade.

The Buffalos were somewhat crippled, owing to the absence of Wise, who was suffering from an injury to his hand.

The preliminary practice of the New Yorks was full of snap, and there was very little looseness in the minds of the spectators as to the result of the game.
